WidgetQueryAspectProvider

WidgetQueryAspectProvider

```
public interface WidgetQueryAspectProvider extends Mutable {
    String XML_TAG = "SimpleAspectProvider";

    int CURRENT_LEVEL = 1;

    /**
     * @return
     */
    boolean isExportAspect();

    /**
     * @return
     */
    boolean isQueryAspect();

    /**
     *
     *
     * @param widgetQueryInfo
     * @throws FineEngineException
     */
    void before(WidgetQueryInfo widgetQueryInfo) throws FineEngineException;

    /**
     *
     *
     * @param widgetQueryInfo
     * @param widgetQueryResult
     * @throws FineEngineException
     */
    void after(WidgetQueryInfo widgetQueryInfo, WidgetQueryResult widgetQueryResult) throws FineEngineException;
}
```

```
<extra-core>
        <WidgetQueryAspectProvider class=""/>
</extra-core>
```

AbstractWidgetQueryAspectProvider

```
@API(level = WidgetQueryAspectProvider.CURRENT_LEVEL)
public abstract class AbstractWidgetQueryAspectProvider implements WidgetQueryAspectProvider {

    @Override
    public int currentAPILevel() {
        return CURRENT_LEVEL;
    }

    @Override
    public String mark4Provider() {
        return getClass().getName();
    }
}
```
