

TableChangeListenerProvider

TableChangeListenerProvider

```
public interface TableChangeListenerProvider extends Mutable {

    String XML_TAG = "TableChangeListenerProvider";

    int CURRENT_LEVEL = 1;

    /**
     *
     * @param tableNames
     */
    void addEvent(Set<String> tableNames);

    /**
     *
     * @param tableNames
     */
    void updateEvent(Set<String> tableNames);

    /**
     *
     *
     * @param tableNames
     */
    void removeEvent(Set<String> tableNames);
}
```

```
<extra-core>
    <TableChangeListenerProvider class=""/>
</extra-core>
```

AbstractTableChangeListenerProvider

```
@API(level = TableChangeListenerProvider.CURRENT_LEVEL)
public abstract class AbstractTableChangeListenerProvider implements TableChangeListenerProvider {

    public int currentAPILevel() {
        return CURRENT_LEVEL;
    }

    @Override
    public String mark4Provider() {
        return getClass().getName();
    }
}
```
