

-Java

1.

```
try {
    doSomething();
} catch (Exception e) {
    LoggerFactory.getLogger().error(e.getMessage, e);
}
```

```
try {
    doSomething();
} catch (Exception e) {
    e.printStackTrace();
}
```

2. INFODEBUG

```
LoggerFactory.getLogger().info("Hello, I am {}.", "test"); // "Hello, I am test."
LoggerFactory.getLogger().debug("Hello, I am {}, it is a {}.", "test", "sheep"); // "Hello, I am test, it is a sheep."
```

3. ignore

```
try {
    doSomething();
} catch (Exception ignore) {
}
```
