JavaJavaScript

Java

```
package com.fr.schedule.plugin;

import com.fr.main.workbook.ResultWorkBook;
import com.fr.stable.fun.mark.Mutable;

import java.io.File;
import java.io.OutputStream;

/**
 * Created by richie on 2016/10/31.
 *
 */
public interface OutputFormatProvider extends Mutable {

    String MARK_STRING = "OutputFormatProvider";

    int CURRENT_LEVEL = 1;

    /**
     * 2
     * @return
     */
    int markNumber();

    /**
     * JavaJavaScript
     * @return
     */
    String markString();

    /**
     *
     * @return
     */
    String fileSuffix();

    /**
     *
     *
     */
    void flush(OutputStream out, ResultWorkBook result) throws Exception;

    /**
     *
     * @param format
     * @return truefalse
     */
    boolean accept(int format);

    /**
     *
     * @param files
     * @return
     */
    File filterFiles(File[] files);
}
```

markNumber42N

CSV

```
public class CsvOutput extends AbstractOutputFormatProvider {
    @Override
    public int markNumber() {
        return 8;
    }

    @Override
    public String markString() {
        return "isConvertToCsv";
    }

    @Override
    public String fileSuffix() {
        return ".csv";
    }

    @Override
    public void flush(OutputStream out, ResultWorkBook result) throws Exception {
        new CSVExporter().export(out, result);
        out.flush();
        out.close();
    }
}
```

JavaScript

```
FS.Plugin.OutputformatProvider = {
    version: 1.0,
    items: []
};
```

```
/**
 *
 */
FS.Plugin.OutputformatProvider.items.push({
    text : function () {
        return 'csv';
    },
    markString: function () {
        return 'isConvertToCsv';
    },
    markNumber : function () {
        return 8;
    }
});
```
