MobileParamStyleProvider

```
package com.fr.report.fun;

import com.fr.json.JSONObject;
import com.fr.stable.fun.mark.Mutable;

/**
 * created by hades on 18/10/29
 *
 */
public interface MobileParamStyleProvider extends Mutable {

    String MARK_STRING = "MobileParamStyleProvider";

    int CURRENT_LEVEL = 1;

    /**
     *
     * @return
     */
    String descriptor();

    /**
     *
     * @return
     */
    JSONObject createJSON();

    /**
     *
     */
    String getStyleType();
}
```

AbstractMobileParamStyleProvider

```
package com.fr.report.fun.impl;

import com.fr.json.JSONException;
import com.fr.json.JSONObject;
import com.fr.log.FineLoggerFactory;
import com.fr.report.fun.MobileParamStyleProvider;
import com.fr.stable.fun.impl.AbstractProvider;
import com.fr.stable.fun.mark.API;

@API(level = MobileParamStyleProvider.CURRENT_LEVEL)
public abstract class AbstractMobileParamStyleProvider extends AbstractProvider implements
MobileParamStyleProvider {

    @Override
    public int currentAPILevel() {
        return CURRENT_LEVEL;
    }

    @Override
    public String mark4Provider() {
        return getClass().getName();
    }

    @Override
    public JSONObject createJSON() {
        JSONObject jo = JSONObject.create();
        try {
            jo.put("queryType", getStyleType());
        } catch (JSONException e) {
            FineLoggerFactory.getLogger().error(e.getMessage(), e);
        }
        return jo;
    }
}
```

```
<extra-report>
  <MobileParamStyleProvider class="com.fr.plugin.topparameterstyle.MobileParamStyleDefine"/>
</extra-report>
