

ServletURLTransformer

```
public interface ServletURLTransformer extends Mutable {

    String XML_TAG = "ServletURLTransformer";

    int CURRENT_LEVEL = 1;

    /**
     *
     *
     * @param req      HTTP
     * @param builder  URL
     * @return URL
     */
    String transform(HttpServletRequest req, StringBuilder builder);

    /**
     *
     *
     * @param servletURL
     * @param checkOut
     * @return
     */
    String prefixForResource(String servletURL, CheckOut checkOut);

    /**
     *
     *
     * @param servletURL
     * @param type
     * @return
     */
    String prefixForImage(String servletURL, String type);

    /**
     *
     *
     * @param servletURL
     * @param source
     * @param type
     * @return
     */
    String prefixForWrite(String servletURL, Object source, String type);
}
```

LikeURLTransform

```
public class LikeURLTransform extends AbstractServletURLTransformer {

    @Override
    public int currentAPILevel() {
        return CURRENT_LEVEL;
    }

    @Override
    public String transform(HttpServletRequest req, StringBuilder builder) {
        return builder.toString();
    }
}
```
